Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: in paragraph [0038], "shoplifetr's" should be --shoplifter's--; in paragraph [0041], delete "Figure_32_2Figure_32_2"; in paragraph [0063], after "embodiment", delete "BM_1_BM_1_".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hogan et al 6,373,390. Hogan et al teach a theft deterrent tag device comprising a clip member to engage a post member, and further providing a spring metal locking arm 66 and shield assembly 54 for blocking the detach arm pathway, wherein the locking arm 66 has a locked and unlocked position. It is noted that the "spring" recitation is inherently met by the spring metal locking arm 66.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nguyen et al 6,535,130 or Sayegh et al 2003/0222780 in view of Yamamoto et al 5,946,957. Nguyen et al and Sayegh et al both teach a theft deterrent tag device comprising a clip member to engage a post member, and further providing a shield assembly (108; 60 respectively) for blocking the detacher arm pathway. Both fail to provide a spring biased locking arm to block the pathway. Yamamoto et al teach a well known keyway cover means comprising a spring biased locking arm having a locked and unlocked position. It would have been obvious to one of ordinary skill in the art to modify the shield or barrier members of either Nguyen or Sayegh by substituting a spring biased locking arm as taught by Yamamoto et al to provide enhanced security against unauthorized keys.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note especially, the spring biased keyway blocking arm 23 of

Myers 5,467,624, the shields and barriers for the keyway of Nguyen et al 6,535,130 (108) and Sayegh et al 2003/0222780 (60).
